WILSON-HURD INTRODUCES CAPACITIVE TOUCH SWITCHES

Wilson-Hurd is pleased to announce the addition of capacitive touch switches to our product offering. If you are looking for the perfect switching solution for your interactive display, our capacitive touch switches are the answer. With no moving parts to wear down, capacitive touch switches offer extreme durability in even the toughest environments.

Features of Capacitive Touch Switches:

- Cost-effective solution
- Several options are available for input methods, including buttons, sliders, touchpads, touchscreens, and proximity sensors
- Wide variety of non-conductive overlay materials can be used, including plastic, acrylic, and glass
- Self-contained system gives flexibility to the overall design of your display
- Additional functions like audio and backlighting can be easily integrated into design

Create the ultimate design for your interactive display with a Capacitive Touch Switch from Wilson-Hurd. For more information, contact our sales team at poporders@wilsonhurd.com.
